Part 1

Intro

1 Introduction

This project aims to solve

1.1 ERP system

Enterprise Resource Planning (ERP) is a software that is built to organizations belonging to different industrial sectors, regardless of their size and strength. ERP is a business management software is usually a suite of integrated applications that a company can use to collect, store, manage, and interpret data from many functional areas.

1.2 Business Process Managment

A business process is an activity or set of activities that can accomplish a specific organizational goal. Business processes should have purposeful goals, be as specific as possible and have consistent outcomes.
